

## **Sonus faber Amati Futura**

This exquisite 3.5-way floorstanding loudspeaker breaks new ground for Sonus faber in transparency, low-level detail, neutrality, transient response, and top-to-bottom coherence, bringing you closer to the sound of a live performance. The lute-shaped Italian cabinetry is drop-dead gorgeous, and masks an enclosure filled with technical innovations designed to reduce resonances and related colorations. While the Amati is not as lush-sounding as its predecessor, massed strings and voices are more accurate and natural. JH, 228
