

## **Sonus faber Liuto**

The all-new Liuto may be the best-value speaker in the Sonus family. A three-way, vented floorstander, it combines warmth and detail with earthy low-frequencies that dip confidently into the 30Hz range. But where it really turns up the heat is in the lack of smearing during complex orchestral passages. The Liuto's primary character shades a bit to the dark side, and in some cases it's not as fast on transients as some others. Nonetheless, it is a high-voltage performer—entertaining and musical.
